

Welcome to West Valley School District

From the Superintendent
Dr. Polly Crowley

I am so proud of our close-knit West Valley educational community. It is a true partnership of students, parents, educators and community members who are committed to a safe, nurturing environment and academic excellence. I cannot think of a better place than West Valley for children to grow up, go to school, and become prepared for college, the workplace and productive citizenship in our diverse nation and world.

In our commitment to ensuring academic success for every child in this district, we philosophically focus on the “3 R’s of West Valley” - relationships, relevance and rigor.

- Relationships: West Valley and its schools are small enough to offer a personalized learning environment where teachers strive to get to know individual needs of students and their families.
- Relevance: Achievement is enhanced when instruction is meaningful and relevant. West Valley delivers a variety of instructional delivery models so that there is an educational setting that fits your child.
- Rigor: Raising the achievement levels for every child in this district is our Number 1 priority.

The West Valley community continues to generously provide resources for our students. Thanks to voter support West Valley High School is now expanded and fully remodeled into a first-class educational facility. Significant additions to our four elementary schools are also complete. This 2008-2009 school year promises to hold new challenges and rewards.

As superintendent, my door is open. I welcome your input and involvement in West Valley School District as we strive together to educate and prepare each of our students for college, career and citizenship.
